

Insurance Pre-Approval Request Report

Pre-Approval Request Details

Request ID: PA-2024-005678
Date Submitted: May 9, 2024
Status: Pending Review
Priority: Standard

Patient Information

Field	Details
Patient Name	Ahmed Mohammed Al-Rashid
Patient ID	PAT-2024-001234
Date of Birth	March 15, 1985 (39 years old)
Gender	Male
Phone	+964 770 123 4567
Address	45 Al-Mansour Street, Baghdad, Iraq

Insurance Information

Field	Details
Insurance Company	National Insurance Company
Policy Number	POL-2024-789456
Group Number	GRP-12345
Policy Holder	Ahmed Mohammed Al-Rashid
Coverage Type	Comprehensive Health Plan
Coverage Percentage	85%
Policy Effective Date	January 1, 2024
Policy Expiration Date	December 31, 2024
Primary Insurance	Yes

Requesting Provider Information

Field	Details
Provider Name	City General Hospital
Provider ID	HOSP-001
Department	Cardiology
Requesting Physician	Dr. Fatima Hassan
Physician NPI	1234567890
Contact Phone	+964 1 234 5678
Contact Email	cardiology@cityhospital.iq

Requested Services

Service 1: Coronary Angiography

Field	Details
CPT Code	93458
Description	Coronary angiography with left heart catheterization
ICD-10 Diagnosis Code	I25.10
Diagnosis Description	Atherosclerotic heart disease of native coronary artery without angina pectoris
Requested Quantity	1 procedure
Estimated Cost	\$1,500.00 USD
Facility	City General Hospital Catheterization Lab
Scheduled Date	May 20, 2024
Urgency	Standard (within 2 weeks)

Service 2: Echocardiogram

Field	Details
CPT Code	93306
Description	Echocardiography, transthoracic, real-time with image documentation (2D), includes M-mode recording, when performed, complete, with spectral Doppler and color flow Doppler
ICD-10 Diagnosis Code	I25.10
Diagnosis Description	Atherosclerotic heart disease of native coronary artery without angina pectoris
Requested Quantity	1 procedure
Estimated Cost	\$250.00 USD
Facility	City General Hospital Cardiology Department
Scheduled Date	May 15, 2024
Urgency	Standard (within 1 week)

Clinical Justification

Medical History

Patient is a 39-year-old male with a 2-year history of hypertension and dyslipidemia. Patient presents with symptoms including occasional chest discomfort on exertion, shortness of breath, and fatigue. Family history is significant for coronary artery disease (father had myocardial infarction at age 50).

Current Symptoms

- Chest discomfort on moderate exertion (3-4 METs)
- Shortness of breath when climbing stairs
- Fatigue with daily activities
- No documented angina at rest

Diagnostic Findings

- ECG:** Normal sinus rhythm, non-specific ST-T wave changes
- Stress Test:** Positive for ischemia at moderate workload
- Lipid Panel:** LDL 160 mg/dL, HDL 38 mg/dL, Triglycerides 200 mg/dL
- Blood Pressure:** 145/95 mmHg (uncontrolled)

Medical Necessity

The patient has documented cardiac symptoms and a positive stress test indicating possible coronary artery disease. Coronary angiography is medically necessary to:

- Confirm the diagnosis of coronary artery disease
- Assess the extent and severity of coronary artery blockages
- Determine appropriate treatment strategy (medical management, PCI, or CABG)
- Rule out other cardiac conditions

Echocardiogram is medically necessary to:

- Assess left ventricular function
- Evaluate valvular function
- Determine cardiac structure and hemodynamics
- Provide baseline data for future comparison

Alternative Treatments Considered

- Medical management alone - Insufficient given positive stress test
- CT Angiography - Not available at facility, less accurate for detailed assessment
- Continued observation - Not appropriate given symptoms and diagnostic findings

Conservative Treatments Tried

- Lifestyle modifications (diet, exercise) - 6 months, insufficient improvement
- Anti-hypertensive medications - Partial response, BP still elevated
- Statin therapy - LDL still elevated despite treatment

Supporting Documentation

Attached Documents:

- Clinical Notes** - Dr. Fatima Hassan, Cardiology Consultation (May 5, 2024)
- ECG Report** - May 5, 2024
- Stress Test Report** - May 6, 2024
- Laboratory Results** - Lipid panel, CBC, BMP (May 5, 2024)
- Previous Medical Records** - Hypertension and dyslipidemia management (2022-2024)

Cost Breakdown

Service	Estimated Cost	Insurance Coverage (85%)	Patient Responsibility
Coronary Angiography	\$1,500.00	\$1,275.00	\$225.00
Echocardiogram	\$250.00	\$212.50	\$37.50
Total Estimated	\$1,750.00	\$1,487.50	\$262.50

Note: Actual costs may vary based on facility charges and insurance company fee schedule.

Request Timeline

- Request Submitted:** May 9, 2024
- Expected Review Time:** 3-5 business days
- Requested Service Date:** May 15-20, 2024
- Authorization Expiration:** June 30, 2024 (if approved)

Special Considerations

- Urgency:** Patient's symptoms are progressive and may require urgent intervention if coronary disease is confirmed
- Risk Factors:** Family history of early CAD, uncontrolled hypertension, dyslipidemia
- Comorbidities:** Hypertension, dyslipidemia - may complicate management
- Work Status:** Patient is employed and may require work restrictions based on findings

Provider Certification

I certify that the requested services are medically necessary for the treatment of this patient's condition. The information provided is accurate and complete to the best of my knowledge. I understand that providing false or misleading information may result in denial of this request and potential legal consequences.

Physician Signature: Dr. Fatima Hassan, MD

Specialty: Cardiology

License Number: IRAQ-CARD-12345

Date: May 9, 2024

Hospital Authorization

This pre-approval request has been reviewed and approved for submission by the hospital administration.

Hospital Administrator Signature: [Signature]

Name: Omar Khalid

Title: Medical Director

Date: May 9, 2024

Insurance Company Response

To be completed by insurance company
